Projects Work

Personal Portfolio Website [\(Project Link \)](#)

Dece - 2023

- Project based on ReactJS Technology.
- This site will showcase my qualification, recent projects, project links, project codes and also provided direct contact option via Email, LinkedIn or WhatsApp for communication.

Newsletter Website [\(Project Code \)](#)

July - 2024

- The News Website is a web application that integrates HTML, CSS and JavaScript with API.
- Users can explore news related to finance, sports, crypto and technology. Through API integration, this project connect different parts together smoothly so that website feels interactive and user-friendly.

Undergraduate Project [\(Project Link \)](#)

April - 2023

- Grandma's Bakery, this project based on HTML, CSS, and JavaScript Technology.
- This is a static webpage where you can select various types of flavours according to your taste. And get the details about the product or you can also add these products into card.

Social Media Clone Website [\(Project Link \)](#)

July - 2023

- Project based on ReactJS Technology.
- It is a clone of Facebook website, where we built front-end (View-layer) by using react components and JavaScript as database (instead of using any particular database).

Certifications

- I completed certification in **WEB DEVELOPMENT (HTML, CSS, JavaScript & ReactJS)** Online Training from Pentagon space Bangalore.
